Task-1

Event Idea! We can conduct a competitive coding competition, where contestents should solve the problem in an efficient way. for written test we will shortlist contestent based on their Resume. for coding contestents would be provided link of hackathon.

Vision: There are many students who can solve the problem but don't know the efficient way of solving problem.

Due to this event they can try to improve themselves and will know about their position of caliber.

Venue: CSG - Building, NITT

Budget: Budget would be varieng at time but there may be at least 10000.

people needed: There would be at least 20 people. some for server handling some for making dicipline and etc.

publicity: For publicity we can through instapase, website, etc
